Subject: H104 - Corporate Password Policy

The CIO would like to see our corporate password policy. Be sure that this policy addresses:

- The construction of passwords (length, complexity)
- Reusability
- Lockout policy
- Are there different requirements for privileged accounts

Respond with a memo that documents the policy, and screen shots showing these elements implemented as technical policies in Windows 2012, 2016, and each Linux variant in the network.

Thank you.

IT Director
